NUMB. 2573

THURSDAY SEPTEMBER 8. 1743.

Yesterday arrived a Mail from Holland.

Petersburgh, August 20.

ER Imperial Majesty persists in her Resolution of having the late Conspiracy examined to the Bottom; but has, at the same time declared, her fix'd Intention of changing all Sentences of Death into Exile, or Imprisonment. We now guess that M. de Biron, formerly Duke of Courland, was not sent back into Siberia without just Grounds. The Ingratitude of most of the Conspirators is no less worthy of Punishment, than their Disloyalty; and the People are so excessively enraged, that they threaten some who are only suspected. Her Majesty resides in the new Summer Palace, which is a very fine Building, and very richly furnish'd. Some of the Apartments are hung with Chinese Tapestry, and every Thing is in high Taste.

Stockholm, August 28. The King has given Orders for assembling 15,000 Men in Scania, in order to observe the Motions of Denmark; and, in case of Necessity, he will march thither seven Finland Regiments. The last Dispatches of Count Tessin are far from being favourable, and we can scarce persuade ourselves, how much so ever we are inclined to it, that a War may be after all avoided. Yesterday the Dyet came to the following Resolutions, viz. 'That the Successor should be accommodated in a Palace near that of the King's; that part of the Royal Stables should be given him; that one of the Royal Houses should be at his Disposal; that his Civil List should be fix'd at 220,000 Dollars; that he shall be present in all Debates in the Senate; that, when the King is present, he shall have only one, and when absent, two Votes.' The Capt. Graham and Theomede have had the Reward promised for retaking Count Lewenhaupt paid them; but (except the Peasants) every Body here look on them with an evil Eye. M. de Montaner, Secretary to the French Embassy, is returned hither from Petersbourg, charged with very important Dispatches from M. Dillion, the French Minister at that Court. We learn, by this Means, that a very strict Enquiry is making there into the late Conspiracy, and that the Knut has not been spared to some of the Accomplices of the lower Rank, in order to force from them such Discoveries as could not be extracted by softer Methods. Our Court has resolv'd to demand the Mediation of the Maritime Powers, in order to terminate amicably, if possible, our Disputes with Denmark.

Naples, August 20. We are in some measure recover'd from our excessive Apprehensions of the Plague. At Reggio, it is true, the epidemic Distemper continues, and about Forty Persons have died of it; but our Physicians are positive it is not Pestilential. In Messina there died not of the Plague, above one or two in a Day. We slacken, however, nothing of our Precautions, but take the same Care, in all Respects, as when we had the worst News. We lately celebrated nine Days Prayer, that God would avert this Evil at which his Majesty assist'd with much Devotion. The People have at length carried their Point against the Jews, who are ordered to depart the Kingdom in two Month's time, or to embrace the Christian Religion; upon which, most of the richest Families are retired into the Queen of Hungary's Dominions.

Rome, August 24. We are still very uneasy about the Spanish Artillery and Ammunition, which have been landed upon our Coast against his Holiness's Will; we expect, that the Count de Gages intends to send a considerable Detachment from his Army, in order to carry it off; which once accomplish'd, we should be not less satisfied than he. The Affair relating to the Friar, whom his Brethren rescued from Officers of Health, has been examined lately, and the Conduct of the Officers appearing every way regular, they have been justified, and the Monks concerned in the Rescue, are condemn'd to suffer ten Years Imprisonment. The Pope having reviewed the whole Process, has been pleas'd to confirm the Decree. As to the late Audience which the Chevalier de St. George had of his Holiness, it was of no greater Consequence than to compliment him on the Anniversary of his Coronation.

Genoa, August 24. Frequent Consultations are held here, in relation to the Affairs of Corsica, which begin to go backwards again. M. Justiani, our Commissary there, informs us, that, encouraged by the Concessions lately made them, the Inhabitants began to rise in their Demands, and that they now insisted, That

whatever Demand had been made, and granted, or should be hereafter granted them, by the Republick, should be guarantied by France; that the Inhabitants should be exempt, for ten Years, from all Taxes whatsoever; that the Diocese of Almeria shall be divided into two, and both Bishops Sees fill'd with Corsicans; that all the Ports of the Island be open to Foreigners; that all the Governors of Bonifacio, Ajaccio, Calvi, and Algajola, should be, for the future, Senators; and the Governor of Bastia one who had born the high Office of Doge. The Spanish Convoy sent to that Island from hence, under the Escort of two English Men of War, is safely arrived; and the Artillery and Military Stores deposited as was agreed at St. Bonifacio.

Vienna, August 31. The Grand Duke set out from hence for his Estates at Hollitsch the Day before Yesterday, where he proposes to stay till her Majesty is up again. As we have drawn prodigious Advantages from the Illyrians, for several Campaigns, her Majesty has been so good as to cause her Thanks to be returned separately to all the Nations of that Denomination; viz. the Waradins, Licanians, Corbavians, Albanians, Slavonians, &c. She likewise directed Gold Chains, and Medals, to be given to each of their Deputies. M. Mortagne, who is Cabinet Courier to the Court of Berlin, arrived herelatey, with Dispatches of very great Importance; upon which the Prussian Minister had an immediate Conference with Count Uhlefeldt, and thereupon a Consultation was held amongst the Cabinet Councilors, and then a general Council, at the rising of which, an Express was sent to Moravia, and another to Prague.

Manheim, September 7. Tho' the Army of the Allies are in a manner just at our Gates, yet can we send no very considerable News about them; except, that such as visit them, are extremely charm'd with the Beauty of the Troops, and the exact Order observ'd by them. According to the last Account we can get, they will continue their March on the 9th; by which time, 'tis thought, the best part of the Dutch Troops will have join'd them. This Army will encamp between Aversheim and Reebach. The French have not altogether abandon'd Spire; on the contrary, they have still some Troops in that Neighbourhood, and they give out, very confidently, that they shall expect the Allies in the Post they possess at present. We have this Moment a very surprizing Piece of News, which is, that the Earl of Stair has very unexpectedly laid down his Employments, order'd his Equipage to be sold, and is preparing to return to England.

ANTI-SYPHILICON.

THE only short and most infallible

Cure in the Universe for the VENEREAL DUMAS, from the lightest Infection to the most extreme and deplorable Degree of it, even when the Blood and Juices are thoroughly contaminated with its malignant Virus, and the very Bones are affected with it.

Fresh Infections, call'd CHAPS, with all their attendant Symptoms, tho' ever so severe, are entirely carried off by it in a few Days, and so as effectually to prevent the Blood and Juices from being tainted with any remaining Relics on one Hand, or a seminal Gleet or Weakness to happen on the other.

And the most inveterate Degree of the French Ulcer, attended with Nocturnal Pains, universal Breakings out, and all the other most exasperated Symptoms, are soon overcome by it, and effectually and much more safely cured than by Salivation, Inunction, or any other Method whatever, and in so easy & pleasant a Manner, without impairing Strength, or occasioning any Inconvenience, as usually to bespeak it the only apposite Remedy or true Venereal Antidote in the World; and this some Thousands have to their great Joy experienced.

It is pleasant to take, occasions no Sickness or Discomfort, nor requires Confinement; but may be taken, and the Cure be accomplish'd, without the Knowledge of the nearest Friend.

Those who suspect they have received an Injury, may by only a Dose or two of it, be perfectly freed from all Apprehensions; for it suffers no lurking Venom to lie hid in the Body, but wholly extirpates it Root and Branch, in a gentle, easy, and most effectual Manner.

All such likewise as doubt they have some remaining Relicks of former Injuries, may by a few Doses of it entirely free themselves from all Suspicion of that Kind; for it admits no Foulness, Corruption, or Putrefaction whatever, to remain in the Fluids, or to adhere to the Solids; and on that Account, in all scorbutick, scrophulous, and even leprous Eruptions or Foulnesses of the Skin, Glandulous Swellings and Impurities of the Juices, it does more by one Dose, than any other Medicine yet known can by ten.

The Price of this most Noble Anti-Syphiliticon is but Six Shillings a Pot, which, considering its extraordinary efficacy, one Pot only being sufficient in most Cases to accomplish the Cure, is not a tenth Part of its Value; and is to be had only at Mr. RAYMOND'S Toyshop, at the Rose and Crown against St. Clement's Church-Yard in the Strand, ready sealed up with a Book of Instructions, by the Perusal of which, all Persons who may ever be affected with any Degree of the Venereal Disease, may perfectly understand their own Condition, and certainly know when, and when not, the Venereal Poison is entirely rooted out of their Bodies.

Note, Ask only for a Six Shilling Pot for the Syphilis.
